STRUCTURE OF TOWN GOVERNMENT SURVEY!

Beginning on July 1st, the Town will be conducting a survey to collect resident feedback and insight on the Town's form of government.

Please visit stoneham-ma.gov between July 1 and October 1 to complete the survey or contact the Select Board Office for more information: (781) 279-2680

INFORMATION ON LOCAL COYOTES

The eastern coyote is well established throughout Massachusetts. They will utilize whatever food is naturally available, including small animals and fruits, as well as artificial sources such as garbage, pet food, birdseed, and compost.

TIPS FOR RESIDENTS: They require only a source of food, water, and cover. If you want to make your property less attractive to coyotes and avoid having any problems with these predators, follow these basic practices. Remember, share these tips with your neighbors; your efforts will be futile if neighbors provide food or shelter for coyotes.

DON'T LET COYOTES INTIMIDATE YOU: Don't hesitate to scare or threaten coyotes with loud noises, bright lights, or water sprayed from a hose.

DON'T FEED OR TRY TO PET COYOTES: Keep wild things wild!

SECURE YOUR GARBAGE: Coyotes raid open trash materials and compost piles.

KEEP BIRD FEEDER AREAS CLEAN AND CLEAR FALLEN FRUIT FROM FRUIT TREES: Use feeders designed to keep seed off the ground, as the seed attracts many small mammals coyotes prey upon.

CLOSE OFF CRAWL SPACES: Coyotes will use areas under porches and sheds for resting and raising young. Close these areas off to prevent animals from using them. Also cut back bushy hedges as these areas provide cover for coyotes and their prey.

PET OWNERS: Although free roaming pets are more likely to be killed by automobiles than by wild animals, coyotes do view cats and small dogs as potential food, and larger dogs as competition. For the safety of your pets, keep them leashed at all times. Outdoor feeding can attract many wild animals.
