

Construction in Stoneham on Montvale Avenue

Dear Neighbor,

Eversource crews are continuing construction activity in Stoneham for the 345-kV Transmission Line Project. This project is designed to increase reliability of the electric grid in the area to meet growing demands for electricity. **Crews from McCourt Construction are mobilizing to complete the replacement of a culvert on Montvale Avenue.**

Construction Hours

Construction hours for the project will be from **Monday through Friday, 7 a.m. – 11 p.m.** starting the week of November 13. Crew will work from 8 a.m. to 5 p.m. the following week and move back into the 7 a.m. to 11 p.m. schedule on November 27. Some work may be conducted beyond normal work hours with approval from the Town of Stoneham.

Construction Work

Replacement of the culvert on Montvale Avenue will occur in two stages. Crews will set up a safe, fixed work zone in the westbound travel lane before excavating the work zone. Once excavated, crews will remove half of the existing culvert, install half of the new precast culvert, and restore the area. When complete, crews will follow the same steps in the eastbound travel lane. During the process, the new transmission duct bank will be installed under the culvert to complete the final section of conduit remaining in Stoneham. Please see the reverse side of this notice and next page for an overview of the work zone area. Final road restoration on this portion of Montvale Avenue will occur at the end of the project.

Traffic Management

We coordinate closely with the Stoneham Police Department and Town officials to maintain a safe and effective flow of traffic around project work areas. Vehicle detours on Montvale Avenue may utilize Maple Street for a portion of this work. One lane of alternating traffic will be maintained during working hours and steel plates will be used to secure the roadway outside of working hours to enable two-way traffic. Local access to property owners and businesses will be maintained along with emergency vehicle traffic.
