To: Tobin Shulman, Board of Appeals Chair
From: Officer Laura Engel (Safety Officer)

In regards to the Residences at Spot Pond, I would have a few recommendations/comments for the planning board.

- Visible numbers on buildings for emergency vehicles.
 - o This includes night time and day time visibility.
- Any work that is done on a public way requires a police detail when occupancy has started on site.
- Any work that blocks a sidewalk requires a police detail.
 - o This includes deliveries of material.
- When work is completed, a key fob for emergency personnel access the building, in case of emergencies.
- Emergency contacts for building management, during the construction process for emergency situations.
- Emergency contacts for building management, after the construction process is completed for emergency situations.

Thank you

Laura Engel
